## North Cyprus

North Cyprus is a place of magic; fully deserving the title “Pearl of the Mediterranean”. It has a rich and colourful tapestry of unspoilt natural beauty that ranges from golden beaches sparkling crystal clear water to fields of carpeted wild flowers and the pine clad heights of the “Beşparmak Mountains” that runs for approximately 160 km (100 miles) along the northern coast of the island. Cyprus covers an area of 9,251 km<sup>2</sup> and is the 3<sup>rd</sup> largest island (after Sicily and Sardinia) in the Mediterranean Sea.

The island enjoys an intense Mediterranean climate with long, warm and dry summers from mid-May to mid-October. The winters are mild and sometimes rainy, lasting from December to February. Summers and winters in Cyprus are separated by short autumn and spring seasons.
