COURSE CATALOGUE DESCRIPTIONS

1st Semester

COMN107 Economics

This course introduces students to the key concept and topic of microeconomics such as opportunity cost, production possibility frontier, demand and supply, elasticity, utility, preferences, production, costs, perfect competition, monopoly.

COMN117 Introduction to Social Sciences

The main purpose of this course is to let students see how seemingly diverse disciplines intermingle — anthropology and economics, for example. In the end, students will be able to approach social issues with unbiased problem-solving skills.

COMN104 Psychology

This course is a broad introduction to the field of psychology. Aim of this course is give the foundation of ‘what is psychology’ and ‘what are the main issues and topics’ in psychology to the students. With this aim student will cover schools in psychology, biological basis of behaviour, sensation and perception, states of consciousness, learning, memory, cognition, psychological disorders, health and stress, life span development and personality development. Students explore the key figures, diverse theoretical perspectives, and research findings that have shaped some of the major areas of contemporary psychology. This course also examines the research methods used by psychologists across these areas to study the origins and variations in human behaviour.

POLS101 Introduction to Political Science

The course provides basic conceptual insight about politics and political science. It covers introduction to and definition of basic concepts of politics, political institutions, political theories, and political behaviours in the society. The objective of this course is to discuss a variety of issues inherent in all political systems and draw logical conclusions in evaluating these systems.

2nd Semester

INTR102 Political Science and International Relations

The course focuses on historical background, concepts and theories in political science and international relations. The objective of this course is to indicate interactions among political science and international relations, and the course discusses how political thoughts, insights into political science, form the basis of international relations.

COMN115 Sociology

The course makes an introduction to the discipline of sociology and provides an outline of the major sociologists, sociological paradigms and areas of sociological inquiry. It aims at developing students' awareness about the society in which they live, with a due emphasis on sociological perspective and sociology as a scientific discipline. Thus, the course helps the students to develop a sociological outlook and understand what such outlook retains in terms of the founding theories, main sociological approaches, and related discussions in those areas ranging from everyday life, culture and globalization to social stratification and mobility.

COMN120 Principles of Law

The course deals with the basics of law. It introduces the students the elements drawn from legal theory, legal philosophy as well as legal practice. It makes special references to Turkish law. It starts with the discussion of what law is and continues with the other rules of social conduct like moral and customary rules. It familiarizes students with legal concepts like “burden of proof” and methods of legal interpretation.

COMN204 Ethics in Profession

The aim of this course is to define ethical principles, to enable students to develop ethical behaviours related to their profession, and to provide information about unethical behaviours that students may encounter in their professions. Within the context of the course, students will demonstrate an understanding of the ethical principles in general or in the application of specialized knowledge, results of research, creative expression, design processes, etc. that are related with their sciences, disciplines and potential professionals.

3rd Semester

INTR201 International Relations I

The course principally aims at explaining International Relations from a general perspective by focusing on the methods and theories in the field. The course has also the objectives of introducing the students the meaning of International Relations through a historical sketch of the state system as well as putting forward the actors and their influence.

INTR203 Political History I

The two important aims of this course are to introduce students with a relatively detailed account of the history of international relations from the Westphalian world order to the First World War and to investigate main historical turning points and factors which were crucial in the formation of the modern international system. In this sense, the course will focus on the nineteenth century power relations within and among the major European powers which led to the outbreak of World War I. Relatedly, the reasons and results of the World War I will be analysed in this course.

POLS201 National Government & Political Institutions

This course will introduce a comparative study about political systems and functioning of structures in them. Formation of modern national government and historical development of political systems in the context of government types will be examined.

POLS207 Political Economy

The aim of this course is to introduce students the study of political economy, with an emphasis on the relationship between politics and economics. The first topics of the course focus on competing explanations for international political and economic forces to provide basic information for further topics. The course continues with the processes, structures, and current issues of controversy in the world economy today.

COMN253 Statistics

The course covers the key definitions (describing data graphically and numerically), probability, important discrete probability distributions (Binomial, Hypergeometric, Poisson), important continuous probability distributions (Uniform, Normal, Exponential), sampling distributions of sample mean, sample proportion and sample variance, single population estimation (confidence interval estimates for the mean and proportion-Student's t-distribution) and two population

estimation (confidence intervals for the paired difference of mean, proportion and variance-Chi-Square test).

4th Semester

INTR202 International Relations II

The horrors of the WW I established a solid understanding that International Relations got to be founded as a separate discipline to study International Relations. This course will examine that since then International Relations theories have begun to compete, contrast and complete each other in explaining and understanding the IR.

INTR204 Political History II

The objective of this course is to give the students an in-depth understanding and knowledge of the following topics: a survey of the world history from the causes of the First World War to the present (1890-2015); the quest for great-power hegemony; the First and Second World Wars; the Bolshevik Revolution and the rise and fall of Communism and fascist powers; the Cold War; the third world and global inequality; power in international politics and the search for national security in the post-cold war era; proliferation of nuclear and bio-chemical weapons of mass destruction, international terrorism and the deterioration of the ecological system.

INTR206 Human Resources Management

The course intends to provide conceptual and application insights of contemporary human resource management practices viz. Recruitment, Selection, Training and Development, Induction, Motivation, performance evaluation and Termination. The course covers the practical implementation of HR practices in the real life business situations which the business students ought to be proficient with.

POLS210 Law and Politics

Even though law and politics are separate social spheres, they are nevertheless closely interconnected. In particular, there are quite a few political philosophers who have also made an important contribution to the philosophy of law. This course will focus upon two classical thinkers, i.e. Marcus Tullius Cicero (106 BC - 43 BC) and Thomas Hobbes (1588-1671). Even though they lived and wrote a long time ago, their work remains of relevance because their work addressed both political and legal issues, thereby contributing to the discussion on competing approaches to philosophy of law.

5th Semester

INTR305 Diplomacy

The aim of the course is to make students understand what the diplomacy is and how it is carried out.

INTR313 Foreign Policy Analysis

The course aims at introducing theoretical perspectives, key actors, structures and processes of foreign policy within the framework of historical and theoretical/conceptual perspectives which will be followed examination of foreign policies of certain major actors of the international system. In that sense, this course intends to help students develop their knowledge and skills in foreign policy analysis in order to explain the behavior of states and critically evaluate complex foreign policy decisions.

INTR353 International Law

The course aims to provide an analysis of the general principles of international law and their application to individuals, to state relations and to relations with international institutions. In that

sense, the course covers various aspects of international law including the nature, theories and sources of international law, the relationship between national law and international law, the states and international organisations within the scope of international law among many others.

POLS315 Political Communication

This course aims to introduce students how human perception affected by the complex relationship between politics, the media and democracy by examining how political actors make use of the media.

6th Semester

INTR352 International Organizations

The theory and practice of international organizations (IOs) is a dynamic and increasingly important dimension of world politics. The purpose of this course is to explore both the theory and the practice of international and regional organizations, to examine their evolution over time and their adaptation to changing circumstances at the global and regional levels. In this framework, this course will cover the examples of the universal inter-governmental organizations, i.e. the League of Nations and the United Nations (UN) as well as the regional organisations set up in various parts of the globe by focusing on their historical origins, organizational structures and decision-making processes.

POLS302 Environmental Policies and Administration

This course introduces the students how to develop environmental policy, governmental and administrative management of environmental problems, and the analysis of basic ecological and other scientific factors that characterize most environmental problems; including problems such as pollution, ozone depletion, global warming and climatic change.

POLS304 Comparative Political Systems

This course is a general introduction to the concepts, theories, and content of comparative politics. The focus throughout this course will be on linking general concepts to empiric cases. The objectives of the course are to use the various theoretical and methodological tools of comparative politics to understand political processes in various countries and regions, to be able to develop a critical thinking, and to articulate reasoned perspectives for political analysis.

COM351 Research Methods

This course aims to provide students with conceptual and theoretical framework in research methods. The course tends to develop student skills in research and the ability to choose research topic, make critical literature review, decide on research approach, and select proper sample by using different aspects of qualitative and quantitative research methods.

INTR314 International Dispute Settlement

There has been a depressingly large number of violent conflicts with a large number of casualties all over the world. This course discusses why the international community has so far failed to reign in bloody conflicts.

7th Semester

INTR409 World Affairs I

This course is a study of world issues and designed to discuss and analyse the latest developments of current international issues with a comprehensive and informed understanding. In this framework, the course will provide a global perspective on current contemporary events and analyse key international issues with the objective of explaining the general context and finding out the main reasons behind those developments.

POLS417 History of Political Thought I

The main objective of the course is to search the history in the making of political thought. In order to do that, the course examines scientificity and tries to explain how theories are formed. It clarifies the relation between theory and practice. Through a historical perspective, the course aims to make the students understand that the modern political thought has roots in history starting from ancient Greece.

POLS409 Political Structure and Analysis

This course aims to introduce the participants with the major ideas of Structuralism and Post-Structuralism, whose major representatives are (mainly French) philosophers, sociologists, anthropologists, psychologists and literary critics. While summarizing its major ideas with relevance to these other disciplines, the course intends to show the relevance of (Post-) Structuralism to the fields of Public Administration and International Relations.

8th Semester

INTR410 World Affairs II

We will discuss and interpret the major contemporary world affairs that are right now in the headlines and trying to understand their reasons and possible long-term impact.

POLS418 History of Political Thought II

The course is designed in two stages. In the first stage, it tries to show why we are studying the history of political thought. From a knowledge theory perspective, it explains to the students how the knowledge constructed and came forward in the political thoughts of philosophers. In the second part of the course, in order to illustrate the formation of the political thought, students choose their political concepts and present two of the most related philosophers on those concepts.

INTR420 Research Project

This is a research project that provides students with the opportunity to undertake independent research with the guidance of a supervisor. The primary focus of the research project is on the areas related to International Relations. It is expected that all students will read and cite extensively the academic literature in their chosen area of research. The students should be able to identify problems/issues in the field of International Relations and use appropriate research methodology to find appropriate solutions. In preparing a detailed research project for grading, students should write coherent, informative and persuasive papers in conformity with the thesis writing rules as set out in the "Directive for the Preparation of Thesis" of the University.

UNIVERSITY HTC ELECTIVE COURSES

COMN106 Turkish

To show the characteristics and rules of operation of Turkish language with examples; to give the students the ability and habit to express their feelings and thoughts accurately and effectively; developing vocabulary through written and oral texts; The aim of this course is to teach the rules of reading texts or the programs they listen to correctly. COMN180 Computer Literacy

This course is an introductory course to computers and their application; the basic components of computers; Random Access Memory (RAM), Read Only Memory (ROM), Central Processing Unit (CPU) and relationship between these hardware are introduced. Operating systems, application software (word processor, power point), Utility Software are introduced. Internet, network connections and the types, digital security and ethics are covered. Social networks and other web-based applications are introduced.

FOREIGN LANGUAGE ELECTIVE COURSES

COMN191 Academic English I

This course is intended for academically oriented students and it aims to bridge the gap between general and academic English. The course aims at developing the skills required for academic study, including note-taking, essay writing, as well as teaching strategies for undertaking research and dealing with unfamiliar academic vocabulary. The course also aims at teaching the features of guided writing, reading strategies such as predicting, skimming, and scanning. At the end of this course the students are expected to be able to; develop strategies, to improve the ability to comprehend complex academic texts, to develop strategies to produce more coherent writing and, make clear, appropriate, relevant notes from academic texts, and to adopt various approaches to deal with new or unknown vocabulary by practising effective use of dictionaries, and through making effective vocabulary records.

COMN192 Academic English II

This course is the continuation of the COMN191 Academic English I course. Similar issues are focused on as in the former course with a higher tone of language. This course integrates all four language skills and teaches students how to integrate skills and content in real-world academic contexts. High-interest and intellectually-stimulating authentic materials are used to familiarize students with academic content. The course also aims at developing the ability to participate in exchanges of information and opinions in the context of the specific field, and to write instructions, descriptions and explanations about topics in the related field. Extra importance is put on teaching student's terminology related to the specific field. (pre-requisite: COMN191)

TECHNICAL ELECTIVE COURSES

BUSN415 Small Business Management

This course provides an introduction to entrepreneurial life, it then focuses on different ways of owning a small business (from scratch or joining an existing business). Furthermore, it examines issues on developing the new venture business plan and focuses on customer related matters. Finally, it draws attention on managing growth in the small businesses.

INTR452 European Studies

This course is designed to evaluate how the experiment of 1951 in the coal and steel sectors among six European nations has grown to be a formal political and economic union by embracing almost all continental states after the developments in the post-cold war period. Within this framework, this course covers the short history of the integration process among the European countries along with the political institutions, the key policies and the most current developments in the European Union including Brexit.

ECON427 Economic Policy

This course will introduce undergraduate students to a survey of contemporary policy issues in macro-economic literature and their application within the economies of Turkey and the TRNC. Economic growth, unemployment, inflation and economic crisis and alternative solutions to the macroeconomic problems are the main subjects of the course.

OSHE201 Occupational Safety and Health

This course provided information on the theory and history of occupational health and safety, and enforcement of laws that address occupational safety and health globally. It also aims to guide students in understanding the roles and responsibilities of workers, unions and employers. This course also reviews other safety related issues and aspects of recognizing, evaluating, and understanding control of safety and health hazards in the workplace.
